Abstract—Astrology is the study of cosmic influence, that is influences associated with the motion of the sun, moon and planets and the position of the stars that are considered to affect all living creatures including humans. It is also the study of the relationship of the motion and position of these heavenly bodies with physical events. Medical astrology is an ancient medical system that associates various parts of the body diseases and drugs as under the influence of the sun, moon and planets along with the twelve astrological signs. Each of the astrological planets and stars are associated with different parts of the human body. The underlying basis for medical astrology, astrology itself is considered to be a superstition as there is no scientific basis for its true belief.

DISEASE

Ascendant is considered body as a whole.. The debilitation of the lord of ascendant is also an indication of “disease because that lord is man’s body. So Ascendant and its lord should be strong for good health. The lord of the sixth house represent and causes disease. The cause of diseases are to be found out from respective houses karaka planets, sixth house sixth lord kanya rasi etc. If the lord of ascendant be a malefic and he is in the ascendant or in kendra or be in conjunction with moon or be in the navamsa of moon the diseases came into appearance. If the lord of ascendant being a malefic be weak and debilitated or he combusted or he eclipsed or the defeated in a planetary way or the aspect by lord of evil house (6,8,12) it produces, diseases and sufferings, it is possible to identify the diseases a person is having or susceptible to in the future using astrology. Once a person knows that he is susceptible to certain kind of disease he could take precautions and preventive measures so as to either prevent the diseases from manifesting.

Blood pressure, though known as “rich man’s disease in the past is becoming a common disease in our country. In this research paper. I would like to highlight the fact that B.P. can be predicted based upon the planetary position and strength.

BLOOD PRESSURES

High blood pressure also called hyper tension, refers to blood pushing against the walls of the arteries with chronically elevated force. Blood pressure that rises above normal levels and remains high conceal to serious health problems including heart attack, heart failure, stroke and kidney failure as well as other health problems.

In astrology, moon and mars influencing blood pressure because moon is the significant of watery system in our body and also mind and thoughts, Mars is the significant of power, strength Blood circulation of the body. So, for this research, I am taking into consideration of mars moon and stars to analyse B.P. in the Horoscopes.

For analysing, I have taken horoscopes of 50 B.P patients who suffering for a long time horoscopes are calculated in K.P method.

Rules:-

1. Ascendent Lord posited in 6th cusp , or 6th lord’ star or connection with Bhava or its Lord.
